

How to Create a Blog

First you must be a registered user of the site. If you are not and don't know how to go about it, see the How to Register document.

It only takes a few minutes and is a once-only chore.

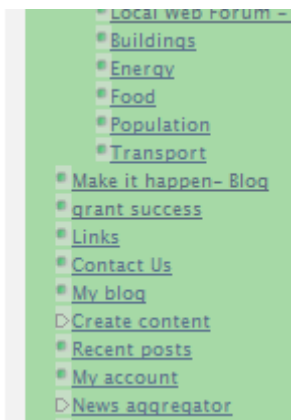

A blog is a regular article about something which interests you and you think might be of interest to the community of visitors to the BCCAN web site. A visitor might be a local person in our physical community or an interested person from cyberspace who might be interested in what you have to say.

Local gardening tips, an experience of building sustainably, a grower of local food/wine or a person who takes an interest in politics are some such examples we could all benefit from on the bccan web site.

Once registered you need to follow these steps.

- ◆ Select Blogs from the Navigation panel.
- ◆ Click on the Post new blog option in the Create Content section
- ◆ Create a topic for your blog
- ◆ Type in your blog
- ◆ Click on Preview or Submit at the bottom of the page.

Select My Blog from the Menu in the right-sidebar.

Click on Post new blog entry
